

# Advanced Methods in Patient Centered Comparative Effectiveness Research

Expanding National Capacity in PCOR through Training (ENACT)

**Now Accepting Applications**

The goal of this training is to deliver innovative online modules on Patient Centered Outcomes Research (PCOR) methods to NIH-funded Research Centers in Minority Institutions (RCMIs). The training will provide synchronous and asynchronous distance learning activities, peer-to-peer learning, and meaningful interactions with scientists, methodologists, and biostatisticians.

Trainees will:

- Complete 4 months of weekly classes, attend virtual peer learning sessions, and participate in live sessions and asynchronous learning activities
- Further expand the 3-5 page proposal from the Fundamentals of PC-CER course to a full grant application using state-of-the-art methods.

Applicants should:

- Be graduate students, residents, fellows, junior faculty, or mid-level senior faculty without PCOR training from one of the 18 institutions with a Research Centers in Minority Institutions Program (RCMI)
- Have a strong interest in conducting PCOR/CER research in their careers
- Have completed a basic biostatistics and a research methods course as pre-requisites
- Have completed the Fundamentals of PC-CER course or have permission of the instructor (Dr. Landsittel; [dpl12@pitt.edu](mailto:dpl12@pitt.edu)).

In partnership with:

- Charles R. Drew University of Medicine and Science
- Howard University
- Meharry Medical College
- Morehouse School of Medicine
- University of Hawaii at Mānoa
- University of Puerto Rico Medical Science Campus

This is a tuition-free course. Applicants who successfully complete this course will be eligible to apply for a fellowship beginning summer 2017. Interested applicants should visit our website for our online application and contact information for the ENACT partner.

**December 1, 2015**

**Application deadline**
